

Truck driver – Class 3 – Delivery of building materials

Description

JOB DESCRIPTION – Driving as well as physical labour

Deliver building materials to customers at their construction sites with a material handler.

Describe your strong sense of team, safety leadership and dedication to customers when applying for this driver – labour position.

Responsibilities

The driver leads the team delivering building materials to customers' construction sites.

The driver and the team unload the materials by hand and, at times, with equipment, such as:

- articulated truck-mounted booms
- specialized carts
- forklifts

The team must ensure the materials aren't damaged during delivery and that each customer is satisfied with the materials and service provided.

The driver leads the team in safety, encouraging and demonstrating safe practices and company policies and procedures.

Qualifications

Those offered the job must:

- Have a current Class 3 licence
- Consent to and pass pre-employment drug testing
- Be ready for physical labour
- Repeatedly lift and carry heavy building materials (as much as 100 pounds or more)
- Provide a clean driver abstract (must be insurable)
- Arrive at work on schedule and fit for duty
- Be legally entitled to work in Canada without sponsorship
